&
Shree Swaminarayan Institute of Technology**

A Project Report On

“CartNova”

Submitted for 4th Semester Project Fulfilment Towards the Degree of
Master of Computer Application (MCA)

Submitted To

Acknowledgement

It gives us immense pleasure to present our project, titled "**CartNova**", as part of the curriculum at **Shree Swaminarayan Institute of Technology (SSIT)**. The successful completion of this project marks an important milestone in our academic journey, and it would not have been possible without the support, guidance, and encouragement of several individuals and institutions, to whom we are deeply grateful.

First and foremost, we extend our heartfelt gratitude to the management of SSIT for providing us with an excellent academic environment, modern facilities, and continuous motivation to pursue innovation and learning beyond the classroom.

We are deeply thankful to our esteemed faculty members for their valuable knowledge, guidance, and constructive feedback, which played a significant role in shaping the direction of our project. Their encouragement helped us to think critically and improve our technical and problem-solving skills.

We would like to express our special thanks to our project guide for their continuous support, technical insights, and patient mentorship throughout the development of this project. Their guidance helped us overcome challenges and maintain a proper development flow.

We also acknowledge the contribution of various external resources such as books, research papers, and online materials, which helped us gain better understanding and strengthen the foundation of our project.

Last but not least, we sincerely appreciate the teamwork and cooperation among all group members. The development of **CartNova** involved brainstorming, coding, testing, and continuous improvements, and it became successful due to the dedication of each member.

Project Team Members:

- Ms. Mahek Shah
- Ms. Krushi Shah
- Mr. Harsh Prajapati

Project Profile

Project Title	CartNova
Project Category	Website
Objective	CartNova aims to be a top eCommerce destination, offering premium products with a seamless shopping experience. Our focus is on customer satisfaction, smooth navigation, and a user-friendly online shopping platform.
Front End	HTML, CSS, JavaScript, Bootstrap
Back End	PHP Laravel, MVC, Mysql
Tool	Visual Studio
Server	Localhost
Documentation Tool	Microsoft Office 2021
Internal Guide	Deena Pujara
Developed By	Mahek Shah(245330694108), Krushi Shah (245330694107), Harsh Prajapati (235330694087)
Group No	22

Work Distribution Between Among Group

- The successful completion of the **CartNova** project was made possible through effective collaboration and clearly defined responsibilities among the team members. The core coding and backend development of the project were efficiently handled by **Harsh Prajapati**, who was responsible for implementing the system's logic, functionality, and technical structure. The user interface design and visual layout were creatively developed by **Shah Mahek**, who ensured that the project maintained a user-friendly and visually appealing interface. All documentation tasks—including the preparation of the project report, formatting of Word files, and compiling supporting documents—were diligently managed by **Shah Krushi**, whose attention to detail ensured the clarity and professionalism of the written material. Each member's contribution played an important role in the overall success and presentation of the project.

Goals & Objective

Project Goals

- The primary goal of the **CartNova** project is to develop a modern and efficient eCommerce web application that simplifies and enhances the online shopping experience for users. The system is designed to provide reliable performance, smooth navigation, and user-friendly operation to meet customer needs effectively.
- This project aims to deliver a complete online shopping solution that integrates clean coding practices, an attractive and responsive user interface, and well-structured functionality. It ensures seamless interaction between users and the system for browsing products, managing carts, and placing orders.
- Overall, **CartNova** focuses on improving customer satisfaction, enhancing usability, and providing a secure and efficient platform for online shopping.

Project Objectives

1. To design a fully functional software system that effectively meets the requirements defined during the initial stages of planning and analysis.
2. To develop a user-friendly and responsive interface that allows smooth interaction between the user and the system, ensuring accessibility and ease of use.
3. To ensure code efficiency and maintainability by using structured programming practices that allow future scalability and updates.
4. To perform comprehensive testing and debugging to eliminate errors, optimize system performance, and ensure all features operate as intended.
5. To produce clear and concise documentation for future maintenance, user guidance, and academic presentation, ensuring the project is well-supported in written form.
6. To deliver a well-integrated system where each component—from interface to backend—works seamlessly as a single unit.
7. To demonstrate teamwork and project management skills by distributing work according to each member's strength:
 - **Coding & Backend Development:** Shah Mahek
 - **UI/UX Design:** Shah Krushi
 - **Documentation:** Prajapati Harsh
8. To apply theoretical knowledge into practical implementation, allowing each team member to gain hands-on experience and enhance technical proficiency.

Problems Area & Project Definition

Problem Areas

In today's digital environment, users often face challenges related to system inefficiencies, lack of user-friendly interfaces, limited functionality, and poor integration between design and back-end logic. Many existing solutions in the domain are either outdated, difficult to use, or not customized to the specific needs of users.

The key problem areas identified include:

- **Lack of Customization:** Many platforms fail to offer flexibility or personalization for different types of users.
- **Poor User Interface:** Complex or outdated UI/UX designs make it difficult for users to navigate and utilize core functions efficiently.
- **Limited Functionality:** Some systems do not include essential features or lack integration across modules, reducing overall effectiveness.
- **Inadequate Documentation:** Many systems are poorly documented, making them hard to maintain or scale in the future.
- **Technical Inefficiencies:** Poorly written code can lead to slow performance, bugs, and issues during updates or expansion.
- **Team Collaboration Gaps:** Lack of clear work distribution can slow down development and lead to inconsistencies.

Project Title: CartNova

- **Project Definition:**
- The **CartNova** project is a software solution designed to overcome the limitations of existing eCommerce systems by delivering a well-structured, feature-rich, and user-friendly application. This project aims to combine effective coding practices, intuitive interface design, and comprehensive documentation into a unified product that is both functional and scalable.
- Developed by a team of three members, the project is structured as follows:
- **Shah Mahek** – Responsible for core coding and backend system development.
- **Shah Krushi** – Handles UI/UX design and user interface development.
- **Prajapti Harsh** – Manages documentation, reporting, and final presentation materials.
- **CartNova** is not only a technical solution but also an academic project intended to demonstrate real-world application of software development skills, project management, and teamwork. The system aims to fulfill user needs by providing a reliable, efficient, and well-documented eCommerce platform that addresses identified problem areas effectively.

System Analysis & Feasibility Study

System Analysis

System analysis involves understanding, evaluating, and defining the system's components, requirements, and behavior to ensure it effectively fulfills user expectations. For the **CartNova** project, the analysis focused on identifying core functional areas, performance requirements, user interactions, and technical structure.

Key points from the analysis:

- **User Requirements:** Users need a system that is fast, intuitive, reliable, and capable of handling tasks efficiently with minimal complexity.
- **Functional Requirements:** The system must provide core eCommerce functionalities such as product browsing, cart management, order processing, and data handling operations.
- **Non-Functional Requirements:** These include system performance, security, scalability, user interface quality, and proper documentation.
- **System Architecture:** The architecture is designed to support modularity, where frontend, backend, and database components are loosely coupled and maintainable.
- **Data Flow:** The system accepts user input, processes it through the application logic layer, and stores or retrieves data from the database securely and efficiently.

Feasibility Study

The feasibility study evaluates whether the CartNova project is viable from technical, operational, economic, schedule, and legal perspectives.

a. Technical Feasibility:

The technologies used in CartNova—including HTML, CSS, JavaScript, Bootstrap, PHP|Laravek, MVC, and MySQL—are widely available and well-supported. The development team possesses the required technical skills (**Harsh Prajapati, Shah Mahek, Shah Krushi**), making the project technically feasible.

b. Operational Feasibility:

The system is designed with a user-friendly interface and smooth navigation, ensuring that users can easily interact with the platform. It effectively meets real-world eCommerce needs, making it operationally feasible.

C. Economic Feasibility:

CartNova is developed as an academic project, using free and open-source tools. No major financial investment is required, making it economically viable.

d. Schedule Feasibility:

The project development followed a structured timeline including planning, design, development, testing, and documentation phases. All tasks were completed within the academic schedule.

e. Legal & Ethical Feasibility:

No legal issues are involved. All tools, frameworks, and content used comply with open-source and academic guidelines.

System Architecture Design

System Architecture Diagram

The **CartNova** project follows a **three-tier architecture approach** to ensure a clear separation between the user interface, application logic, and data storage. This structure improves scalability, modularity, and maintainability of the system.

Three-Tier Architecture Overview:

1. Presentation Layer (Frontend)

- Handles interaction with the user through a graphical interface (UI).
- Includes components like forms, buttons, inputs, and dashboards.
- Frontend technologies may include HTML, CSS, JavaScript, and Bootstrap.

2. Application Layer (Backend)

- Processes user inputs, applies business logic, and coordinates tasks between the frontend and backend.
- Includes functionalities like data processing, validation, and calculations.
- The backend may be implemented using PHP | Laravel And MVC.

3. Data Layer (Database)

- Responsible for storing, retrieving, and managing application data.
- Ensures data consistency, security, and integrity.
- Database used: **MySQL (XAMPP 8.2.4)s**

System Requirement Specification (SRS)

The System Requirement Specification (SRS) defines all the functional and non-functional requirements that the **CartNova** system must fulfill. It also includes hardware and software requirements, performance metrics, and external interfaces.

A. Functional Requirements:

A. User Registration and Login:

- a. Users must be able to register and log in to the system.
- b. The system validates user credentials, manages sessions, and provides role-based access (admin and user).

B. Dashboard Interface:

- A. Users will have access to a personalized dashboard based on their role.
- B. Users can navigate different sections such as product browsing, cart, and order management.

C. Product and Data Processing:

- a. The system allows users to browse products and manage cart operations.
- b. Data entered through forms is validated on both frontend and backend.
- c. All processed data is stored securely in the database.

D. Order Management:

- a. Users can place orders and view order history.
- b. Admin can manage and update order status.

E. Admin Controls:

- a) Admin users can manage products, users, and orders.
- b) Admin has access to system monitoring and control features.

B. Non-Functional Requirements:

1. Usability:
 - The system must have a simple and user-friendly interface.
 - It should be responsive and accessible on desktop and mobile devices.
2. Performance:
 - The system should respond within 2–3 seconds for user actions.
 - It should support multiple users simultaneously without performance issues.
3. Security:
 - User passwords should be encrypted.
 - Data transmission should be secure.
 - Role-based access control must be implemented for admin and users.
4. Scalability:
 - The system should support future feature expansion.
 - It should handle increasing users and data efficiently.
5. Reliability:
 - The system should run smoothly without frequent crashes
 - Regular backups should be maintained for important data..

C. Hardware Requirements:

- Processor: Intel i3 or higher
- RAM: Minimum 4 GB
- Storage: At least 500 MB of free space
- Display: Minimum 1280x720 resolution

D. Software Requirements:

- Operating System: Windows
- Frontend: HTML5, CSS, Bootstrap
- Backend: PHP | Laravel And MVC
- Database: MySQL,
- IDE: VS Code

Module Hierarchy

The **CartNova** project is divided into modular components to ensure easier development, maintenance, and scalability. Each module is responsible for specific functionality of the system.

Top-Level Modules:

1. User Module:

- **User Registration:** Allows new users to create accounts.
- **Login & Authentication:** Handles user login, session management, and security.
- **Profile Management:** Enables users to update and manage their personal information.

2. Product Module:

- **Product Listing:** Displays all available products..
- **Product Details:** Shows detailed information about each product.
- **Search & Filter:** Helps users find products easily.

3. Cart Module:

- **Add to Cart:** Users can add products to cart.
- **Update Cart:** Modify quantity or remove items.
- **Cart Summary:** Displays total price and selected items.

4. Admin Module:

- **User Management:** Admin can manage user accounts.
- **Product Management:** Add, update, or delete products.
- **Order Management:** View and manage customer orders.
- **System Settings:** Manage configurations and system control.

5. Order Module:

- **Order Placement:** Handles checkout and order confirmation.
- **Order Tracking:** Allows users to track order status.
- **Order History:** Displays previous orders.

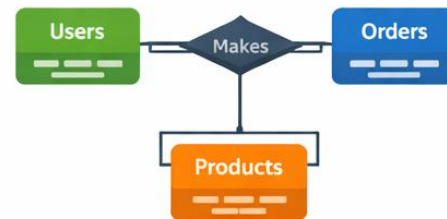

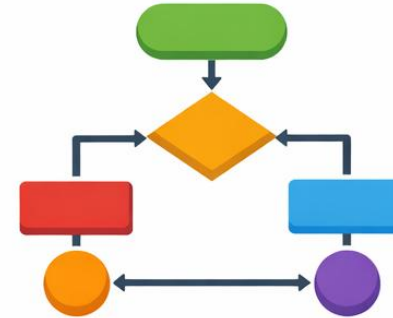

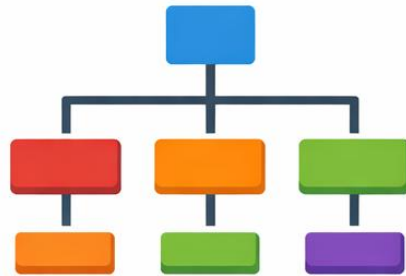

6. Database Module:

- **Data Storage:** Stores all system data securely.
- **Query Handling:** Manages database operations efficiently.
- **Data Retrieval:** Provides fast access to required data.

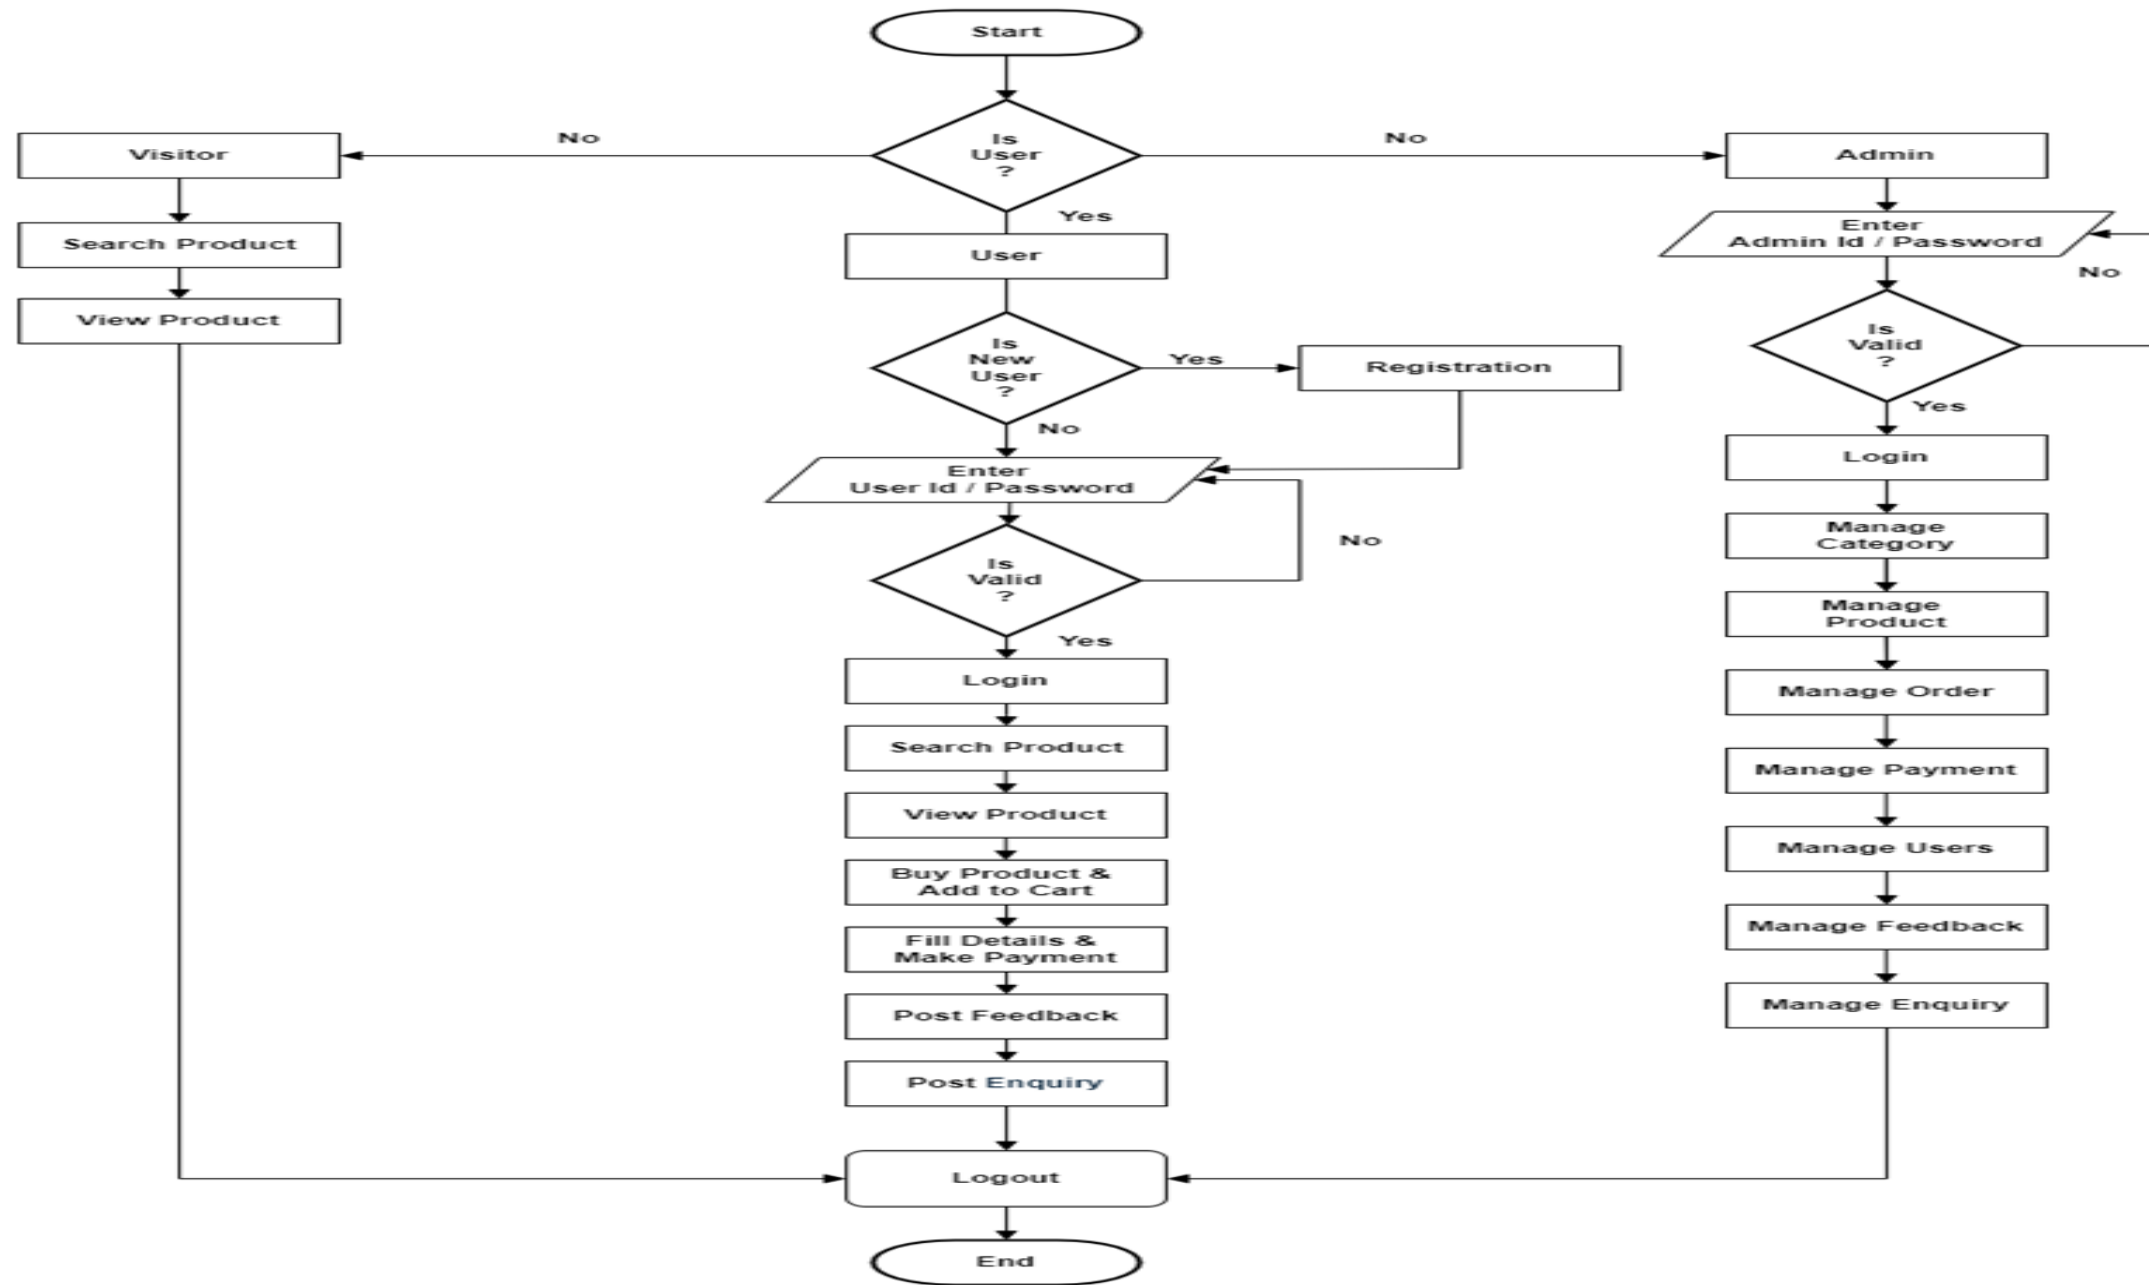

7. Reporting Module:

- **Report Generation:** Generates system reports.
- **Data Export:** Allows export of reports in PDF/CSV format.

DATA DICTIONARY

1. Admin Table

Primary Key: id

Table Description: Represents Admin/User Details

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique identifier for each admin/user
2	name	varchar(255)	Not Null	Full name of user/admin
3	email	varchar(255)	Not Null, Index	Email address (unique login ID)
4	phone	varchar(255)	Nullable	Contact number
5	is_admin	tinyint(1)	Default = 0	1 = Admin, 0 = Normal user
6	email_verified_at	timestamp	Nullable	Email verification time
7	password	varchar(255)	Not Null	Encrypted password
8	remember_token	varchar(100)	Nullable	Remember login token
9	created_at	timestamp	Nullable	Record creation time
10	updated_at	timestamp	Nullable	Last updated time

2. Product Table

Primary Key: id

Foreign Key: user_id → users(id)

Table Description: Represents
Product Details

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique product identifier
2	user_id	bigint(20) unsigned	Foreign Key (references users.id)	Owner/creator of product
3	name	varchar(255)	Not Null	Product name
4	description	text	Nullable	Product description
5	category	varchar(255)	Not Null	Product category
6	brand	varchar(255)	Nullable	Brand name
7	price	decimal(10,2)	Not Null	Selling price
8	original_price	decimal(10,2)	Nullable	Original price before discount
9	discount	int(11)	Default = 0	Discount value
10	image	varchar(255)	Nullable	Product image
11	stock	int(11)	Default = 0	Available stock
12	rating	decimal(2,1)	Default = 0.0	Average rating
13	reviews_count	int(11)	Default = 0	Total reviews
14	is_prime	tinyint(1)	Default = 0	Prime delivery flag
15	is_featured	tinyint(1)	Default = 0	Featured product flag
16	created_at	timestamp	Nullable	Created time
17	updated_at	timestamp	Nullable	Updated time
18	sold_count	int(11)	Default = 0	Total sold quantity
19	views	int(11)	Default = 0	Product views count

3. Cart Table

Primary Key: id

Foreign Keys:

- user_id → users(id)
- product_id → products(id)

Table Description: Represents User Cart Details.

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique cart record ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	User who added product to cart
3	product_id	bigint(20) unsigned	Foreign Key (products.id)	Product added to cart
4	quantity	int(11)	Default = 1	Quantity of product in cart
5	created_at	timestamp	Nullable	Record creation time
6	updated_at	timestamp	Nullable	Record last updated time

4. Order Table

Primary Key: id

Foreign Key: user_id → users(id)

Table Description: Represents Order Details and Payment Information

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique order ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	User who placed the order
3	order_number	varchar(255)	Not Null, Unique	Unique order reference number
4	status	varchar(255)	Default = pending	Order status (pending, shipped etc.)
5	full_name	varchar(255)	Not Null	Customer full name
6	phone	varchar(255)	Not Null	Contact number
7	address_line1	varchar(255)	Not Null	Address line 1
8	address_line2	varchar(255)	Nullable	Address line 2
9	city	varchar(255)	Not Null	City name
10	state	varchar(255)	Not Null	State name
11	pincode	varchar(255)	Not Null	Postal code
12	payment_method	varchar(255)	Default = cod	Payment type (COD, Online)
13	payment_status	varchar(255)	Default = pending	Payment status
14	razorpay_order_id	varchar(255)	Nullable	Razorpay order reference
15	razorpay_payment_id	varchar(255)	Nullable	Razorpay payment ID
16	razorpay_signature	varchar(255)	Nullable	Payment verification signature
17	subtotal	decimal(10,2)	Not Null	Total before discount/shipping
18	discount	decimal(10,2)	Default = 0.00	Discount applied
19	delivery_charge	decimal(10,2)	Default = 0.00	Delivery fee
20	total	decimal(10,2)	Not Null	Final payable amount
21	notes	text	Nullable	Additional customer notes
22	placed_at	timestamp	Nullable	Order placed time
23	created_at	timestamp	Nullable	Record created time
24	updated_at	timestamp	Nullable	Record updated time

5. Order Items Table

Primary Key: id

Foreign Keys:

- order_id → orders(id)
- product_id → products(id)

Table Description: Represents Individual Products in an Order

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique order item ID
2	order_id	bigint(20) unsigned	Foreign Key (orders.id)	Related order
3	product_id	bigint(20) unsigned	Foreign Key (products.id), Nullable	Related product
4	product_name	varchar(255)	Not Null	Product name at time of order
5	product_brand	varchar(255)	Nullable	Brand name
6	product_image	varchar(255)	Nullable	Product image
7	price	decimal(10,2)	Not Null	Price at purchase time
8	original_price	decimal(10,2)	Nullable	Original price
9	quantity	int(11)	Not Null	Quantity ordered
10	subtotal	decimal(10,2)	Not Null	Total price (price × quantity)
11	created_at	timestamp	Nullable	Record creation time
12	updated_at	timestamp	Nullable	Record update time

6. Password Reset Table

Primary Key: email
Table Description: Stores Password Reset Token Information

Sr. No	Field Name	Data Type	Constraint	Description
1	Email	varchar(255)	Primary Key, Not Null	User email for password reset
2	Token	varchar(255)	Not Null	Secure reset token
3	created_at	timestamp	Nullable	Token creation time

7. Address Table

Primary Key: id

Foreign Key: user_id → users(id)

Table Description: Stores User Address Details

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique address ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	User who owns the address
3	full_name	varchar(255)	Not Null	Recipient full name
4	phone	varchar(255)	Not Null	Contact number
5	address_line1	varchar(255)	Not Null	Primary address line
6	address_line2	varchar(255)	Nullable	Secondary address line
7	city	varchar(255)	Not Null	City name
8	state	varchar(255)	Not Null	State name
9	pincode	varchar(6)	Not Null	Postal code
10	type	varchar(255)	Default = home	Address type (home/work/other)
11	is_default	tinyint(1)	Default = 0	Default address flag
12	created_at	timestamp	Nullable	Record creation time
13	updated_at	timestamp	Nullable	Record last updated time

8. Coupon Table

Primary Key: id
Table Description: Stores Coupon / Discount Code Details

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique coupon ID
2	code	varchar(255)	Not Null, Unique (Index)	Coupon code (e.g. SAVE10)
3	description	varchar(255)	Nullable	Coupon description
4	type	enum('percentage', 'fixed')	Not Null	Discount type
5	value	decimal(10,2)	Not Null	Discount value
6	min_order_amount	decimal(10,2)	Default = 0.00	Minimum order value required
7	max_discount	decimal(10,2)	Nullable	Maximum discount limit
8	usage_limit	int(11)	Nullable	Total usage limit
9	used_count	int(11)	Default = 0	How many times used
10	per_user_limit	int(11)	Default = 1	Limit per user
11	is_active	tinyint(1)	Default = 1	Coupon status (active/inactive)
12	starts_at	timestamp	Nullable	Coupon start date
13	expires_at	timestamp	Nullable	Coupon expiry date
14	created_at	timestamp	Nullable	Record creation time
15	updated_at	timestamp	Nullable	Record update time

9. Coupon Usage Table

Primary Key: id

Foreign Keys:

- coupon_id → coupons(id)
- user_id → users(id)
- order_id → orders(id)

Table Description: Stores Coupon Usage History by Users

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique usage ID
2	coupon_id	bigint(20) unsigned	Foreign Key (coupons.id)	Applied coupon
3	user_id	bigint(20) unsigned	Foreign Key (users.id)	User who used coupon
4	order_id	bigint(20) unsigned	Foreign Key (orders.id), Nullable	Related order
5	discount_amount	decimal(10,2)	Not Null	Discount applied amount
6	created_at	timestamp	Nullable	Record creation time
7	updated_at	timestamp	Nullable	Record update time

10. Support Ticket Table

Primary Key: id

Foreign Keys:

- user_id → users(id)
- assigned_to → users(id)
(Admin/Support staff)

Table Description: Stores Customer Support / Complaint Tickets

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique ticket ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	User who created ticket
3	ticket_number	varchar(20)	Not Null, Unique	Unique ticket reference number
4	subject	varchar(255)	Not Null	Ticket subject
5	message	text	Not Null	User issue description
6	admin_response	text	Nullable	Admin reply
7	category	enum('order_issue','payment_problem','product_issue',...)	Not Null	Issue category
8	priority	enum('low','medium','high','urgent')	Default = medium	Priority level
9	status	enum('open','in_progress','pending_customer','resolved','closed')	Default = open	Ticket status
10	opened_at	timestamp	Nullable	Ticket open time
11	first_response_at	timestamp	Nullable	First response time
12	resolved_at	timestamp	Nullable	Resolution time
13	closed_at	timestamp	Nullable	Closing time
14	email_notifications	tinyint(1)	Default = 1	Email alert enabled
15	contact_preference	varchar(255)	Default = email	Preferred contact method
16	order_number	varchar(255)	Nullable	Related order number
17	transaction_id	varchar(255)	Nullable	Payment transaction ID
18	product_id	varchar(255)	Nullable	Related product ID
19	attachments	longtext	Nullable	Uploaded files/data
20	satisfaction_rating	tinyint(4)	Nullable	Customer rating (1–5)
21	feedback_comments	text	Nullable	Customer feedback
22	internal_notes	text	Nullable	Admin internal notes
23	assigned_to	bigint(20) unsigned	Foreign Key (users.id), Nullable	Assigned support agent
24	created_at	timestamp	Nullable	Record created time
25	updated_at	timestamp	Nullable	Record updated time

11. Notifications Table

Primary Key: id

Foreign Keys:

- user_id → users(id)
- customer_support_id → customer_support_tickets(id) (or support_tickets table if applicable)

Table Description: Stores System Notifications for Users

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique notification ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	User receiving notification
3	customer_support_id	bigint(20) unsigned	Foreign Key (support table)	Related support ticket (if any)
4	Type	varchar(255)	Not Null	Notification type (info, alert)
5	Title	varchar(255)	Not Null	Notification title
6	Message	text	Not Null	Notification message
7	is_read	tinyint(1)	Default = 0	Read status (0 = unread, 1 = read)
8	read_at	timestamp	Nullable	Time when notification read
9	data	longtext	Nullable	Extra JSON/meta data
10	created_at	timestamp	Nullable	Created time
11	updated_at	timestamp	Nullable	Updated time

12. Gift Card / Wallet Table

Primary Key: id
Foreign Key: user_id → users(id)
Table Description: Stores Gift Card / Wallet Balance Details

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique gift card ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	Owner of gift card
3	card_number	varchar(20)	Not Null, Unique (Index)	Gift card number
4	card_code	varchar(10)	Not Null, Unique (Index)	Security/activation code
5	card_type	varchar(255)	Not Null	Type of card
6	card_name	varchar(255)	Not Null	Name of card
7	description	text	Nullable	Card details
8	initial_value	decimal(10,2)	Not Null	Starting balance
9	current_balance	decimal(10,2)	Not Null	Remaining balance
10	currency	varchar(3)	Default = USD	Currency type
11	status	enum('active','expired','used','inactive')	Default = active	Card status
12	expiry_date	date	Nullable	Expiry date
13	activated_at	timestamp	Nullable	Activation time
14	last_used_at	timestamp	Nullable	Last usage time
15	notes	varchar(255)	Nullable	Extra notes
16	priority	enum('low','medium','high')	Default = medium	Priority level
17	notify_expiry	tinyint(1)	Default = 1	Expiry notification
18	notify_low_balance	tinyint(1)	Default = 1	Low balance alert
19	low_balance_threshold	decimal(10,2)	Default = 10.00	Alert threshold
20	purchase_source	varchar(255)	Nullable	Where card purchased
21	purchase_date	date	Nullable	Purchase date
22	receipt_number	varchar(255)	Nullable	Payment receipt
23	created_at	timestamp	Nullable	Record created time
24	updated_at	timestamp	Nullable	Record updated time

13. Notifications Table

Primary Key: id
Foreign Key: user_id → users(id)
Table Description: Stores User Notifications (System Alerts, Updates, Messages)

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique notification ID

3	type	varchar(255)	Not Null	Notification type (info, order, etc.)
4	title	varchar(255)	Not Null	Notification title
5	body	text	Not Null	Main notification message
6	icon	varchar(255)	Default = ?	Notification icon
7	url	varchar(255)	Nullable	Redirect link
8	is_read	tinyint(1)	Default = 0	Read status (0 = unread, 1 = read)
9	data	longtext	Nullable	Extra JSON/data payload
10	created_at	timestamp	Nullable	Record creation time
11	updated_at	timestamp	Nullable	Record update time

14. Payment Methods Table

Primary Key: id
Foreign Key: user_id → users(id)
Table Description: Stores User Payment Method Details (Card, UPI, Wallet, PayPal, Bank)

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique payment method ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	Owner of payment method
3	type	enum('credit_card','debit_card','paypal','upi','bank','wallet')	Default = credit_card	Payment method type
4	card_number	varchar(255)	Nullable	Card number (encrypted/hidden)
5	cardholder_name	varchar(255)	Nullable	Name on card
6	card_expiry_month	varchar(255)	Nullable	Expiry month
7	card_expiry_year	varchar(255)	Nullable	Expiry year
8	card_type	varchar(255)	Nullable	Visa/MasterCard etc.
9	paypal_email	varchar(255)	Nullable	PayPal account email
10	upi_id	varchar(255)	Nullable	UPI ID
11	bank_name	varchar(255)	Nullable	Bank name
12	bank_account_number	varchar(255)	Nullable	Bank account number
13	wallet_provider	varchar(255)	Nullable	Wallet provider (Paytm etc.)
14	wallet_number	varchar(255)	Nullable	Wallet number
15	is_default	tinyint(1)	Default = 0	Default payment method flag
16	nickname	varchar(255)	Nullable	User label for method
17	created_at	timestamp	Nullable	Record creation time
18	updated_at	timestamp	Nullable	Record update time

15. Return / Refund Request Table

Primary Keys: id

Foreign Keys:

- order_id → orders(id)
- user_id → users(id)
- order_item_id → order_items(id)

Table Description: Stores Product Return and Refund Requests

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique return request ID
2	order_id	bigint(20) unsigned	Foreign Key (orders.id)	Related order
3	user_id	bigint(20) unsigned	Foreign Key (users.id)	User who requested return
4	order_item_id	bigint(20) unsigned	Foreign Key (order_items.id), Nullable	Specific product item
5	reason	varchar(255)	Not Null	Reason for return
6	message	text	Nullable	Detailed explanation
7	status	enum('pending','approved','rejected')	Default = pending	Return request status
8	pickup_address	varchar(255)	Nullable	Pickup location
9	pickup_date	date	Nullable	Scheduled pickup date
10	pickup_status	varchar(255)	Default = pending	Pickup status
11	created_at	timestamp	Nullable	Request created time
12	updated_at	timestamp	Nullable	Request updated time

16. Product Review Table

Primary Key: id

Foreign Keys:

- user_id → users(id)
- product_id → products(id)

Table Description: Stores Customer Reviews and Ratings for Products

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique review ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	User who wrote review
3	product_id	bigint(20) unsigned	Foreign Key (products.id)	Reviewed product
4	rating	tinyint(4)	Not Null	Product rating (1–5 stars)
5	title	varchar(255)	Nullable	Review title
6	body	text	Nullable	Detailed review content
7	helpful_count	int(11)	Default = 0	Number of helpful votes
8	verified_purchase	tinyint(1)	Default = 0	Verified buyer flag
9	created_at	timestamp	Nullable	Review creation time
10	updated_at	timestamp	Nullable	Last updated time

17. Wishlist Table

Primary Key: id

Foreign Keys:

- user_id → users(id)
- product_id → products(id)

Table Description: Stores User Wishlist (Saved Products)

Sr. No	Field Name	Data Type	Constraint	Description
1	id	bigint(20) unsigned	Primary Key, Auto Increment	Unique wishlist record ID
2	user_id	bigint(20) unsigned	Foreign Key (users.id)	User who saved product
3	product_id	bigint(20) unsigned	Foreign Key (products.id)	Saved product
4	created_at	timestamp	Nullable	Added time
5	updated_at	timestamp	Nullable	Last updated time

Screen Layout

Website Logo

The logo for CartNova is displayed on a dark navy blue rectangular background. The word "Cart" is written in a white, bold, sans-serif font, and the word "Nova" is written in an orange, bold, sans-serif font. The two words are joined together without a space.

The image is a screenshot of a web browser window. The top part shows a browser tab with the address bar containing the URL "127.0.0.1:8000/orders/CNV-260420-69E5AB3DAEA6B-684". The browser interface includes navigation buttons, a search bar, and a sidebar with "Downloads" and "Shipping Address" sections. The "Shipping Address" section lists the address: "Radhe, 19 DREAMLAND PARK SOCIETY OPP PATHIK SOCIETY, NARANPURA CHAR RASTA, Ahmedabad (M Corp.) (Part), Gujarat 380013". The "Downloads" section shows a file named "invoice-CNV-260420-69E5AB3DAEA6B-684.pdf" with a progress bar indicating it is 975 KB. Below the browser window, a PDF viewer is open, displaying the invoice. The invoice header includes the title "INVOICE — CNV-260420-69E5AB3DAEA6B-684" and the CartNova logo. The main body of the invoice is divided into three columns: "Bill To", "Ship To", and "Sold By". The "Bill To" and "Ship To" columns contain the same address information as the browser's shipping address section. The "Sold By" column lists "CartNova Pvt Ltd, Ahmedabad, Gujarat" and the email "support@cartnova.in". Below the address section, there is a table with the following data:

#	Product	Qty	Price	Total
1	Apple iPhone 15 Pro Max 256GB	1	₹ 134,900	₹ 134,900
Subtotal			₹ 134,900	
Discount			-₹ 15,000	
Grand Total			₹ 134,900

Tools & Technologies

Project Title: CartNova

The CartNova project has been developed using modern and reliable technologies that ensure fast development, responsive design, secure data handling, and maintainable code. The selected tools are suitable for academic-level project development and provide a strong foundation for a full-stack web application.

1. Frontend Technologies (User Interface Design):

- HTML5 – For structuring the content of the web pages.
- CSS3 – For styling and creating responsive designs.
- JavaScript – For adding interactivity to the user interface.

2. Backend Technologies (Logic & Functionality):

- Python or PHP – Used for implementing server-side logic and managing interactions between the frontend and database.

3. Database:

- MySQL – A reliable, open-source relational database used to store and manage structured data securely.
- XAMPP / phpMyAdmin – Optional tools for managing and testing MySQL databases in a local environment (if using PHP).

4. Development & IDE Tools:

Visual Studio Code (VS Code) – A lightweight and powerful source-code editor used for writing and managing project code.

FUTURE ENHANCEMENT

- **Mobile App Development**

Develop a mobile application to provide users with a more convenient shopping experience on smartphones, optimized for performance and usability.

- **Website Launch & Accessibility**

Deploy the website on a live server to make it publicly accessible for users to browse products and place orders anytime.

- **Order Tracking & Delivery Estimates**

Implement real-time order tracking where users can view the current status of their order along with estimated delivery time for better transparency.

- **Profile Customization**

Allow users to upload profile images and personalize their accounts to enhance user engagement and experience.

- **Automated Email Receipts**

Introduce an automated email system that sends purchase receipts instantly after order confirmation for better transaction records.

- **Enhanced Notification System**

Send real-time notifications via email or SMS for order updates such as confirmation, shipping, and delivery status.

THANK YOU
